Water play is a great way to beat the heat and have summer fun. Being prepared can help you relax and enjoy the fun!

NEVER ALONE Never leave a child unattended around water under ANY circumstances, even for a moment. A flotation device does NOT replace adult supervision.

FENCE IT IN Install a barrier around the entire pool area and ensure that all doors and windows leading to the pool area are locked. The barrier should include a self-closing door and vertical bars with openings no wider than 4 inches.

EYES OPEN Have a dedicated "water watcher" stationed pool-side. This person should remain in a spot where he or she can clearly see the entire pool area and everyone in it. Have adults take turns as "water watcher" so they can remain attentive. When switching duty, ALWAYS have the new person confirm verbally that they are on duty.

LEARN CPR Hopefully you'll never need to use this life-saving skill, but give yourself peace of mind by taking a course.

DUMP IT OUT Drain buckets, inflatable pools and coolers after use and store them upside down so water cannot collect.

HAVE A PLAN Create a family water safety plan – always swim with a buddy, inexperienced swimmers stay on the steps, no diving in shallow water, etc.

DON'T DRINK AND SWIM Do not mix alcohol and swimming.

Be Safe
